BIKE PARKING AND BICYCLE STORAGE SOLUTIONS

THE POPULARITY OF CYCLING CONTINUES TO INCREASE NOT ONLY FOR HEALTH, FITNESS AND RECREATION, BUT ALSO AS AN ENVIRONMENTALLY FRIENDLY MEANS OF TRANSPORT. BICYCLES ARE BACK IN CITIES, ON UNIVERSITY CAMPUSES, AND ARE SO OFTEN FOUND SURROUNDING BUILDINGS AND WORKSPACES. ENCOURAGING BICYCLE USE PROVIDES ADVANTAGES THAT ARE GOOD IN EVERY WAY: BETTER PARTICIPATION IN PUBLIC TRANSIT, MORE AVAILABLE PARKING FOR AUTOMOBILES, CLEANER AIR, AND SECURITY.

Commitment to Quality

An industry leader in the design and manufacture of decorative bike parking products, Reliance Foundry is proud of our long history and commitment to quality. From concept to production, our significant manufacturing experience is brought to the forefront in all aspects of our customers' experience. Our goal is to ensure that our bike racks, bike stands, bike bollards and bike racks excel in functionality, and add real value to our customers' facilities.

Bike Racks

Reliance Foundry is a premier provider of decorative bike storage racks that are innovative, practical, and aesthetically pleasing. Our nearly endless supply of commercial bicycle racks is sure to help any facility find the best bike rack to meet their parking requirements. Some commercial bicycle racks are built to fit into small places, while others are built to accommodate numerous bicycles. Some racks are built with a focus on accessibility, while others are more concerned with bicycle security. With so many style choices and mounting options available - Reliance Foundry is sure to have the perfect storage solution for your bikes.

Bike Lockers

With growing concern for public safety, many transit planners and other facility planners are looking for options to make cycle storage more effective with bike lockers. Reliance Foundry's attractive, new, pad-mounted bike lockers are easy to install, they require minimal maintenance, and they provide the ultimate in bicycle security. Not only are these new bike lockers aesthetically pleasing, but because they are highly visible and easily secured, they promote bicycle use and safety.

PRESTIGIOUS DESIGN TRUSTED QUALITY

Bike Bollards

Storing a bicycle improperly can result in damage to the bike itself, injury to people, and injury to the property around it. Storing a bike properly prolongs the life of the bike, and keeps the mechanical components working fluently and safely. Our decorative, stand-alone, steel bike bollards provide for the support of bicycles at two places and locking in at least one. Our decorative bike bollards are designed using either surface mount or embedded installation options. All of our bike bollards are strong, durable & weather resistant, and are available in a complete range of powder-coated colors.

Our entire Bollard product line can be used to restrict unwanted vehicle traffic from designated areas; they are ideally suited for pedestrian zones, biking and hiking paths, government buildings, schools, and anywhere that needs traffic flow restricted to vehicles less than your desired width. Our Bike Bollards serve the dual purpose of restricting motorized vehicle traffic at the same time as providing bike parking for occasional and convenient short stay use. Bike Bollards have various advantages - they;

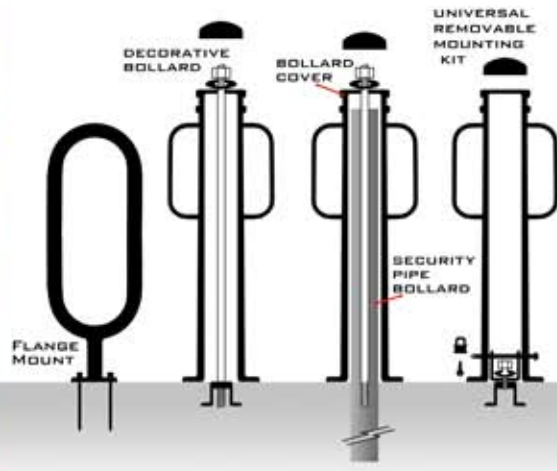

- reduce the need for stand-alone bollards, as one Bike Bollard does both jobs; the Bike Bollard provides bike storage while doubling as a barrier or demarcation
- are specifically designed for sidewalks and other narrow space applications. The design restricts bikes to parking parallel with the rack so bikes won't protrude out into the sidewalk or street
- take up very little space, ensure easy use for the daily cyclist, and manage the chaos of wheels and pedals
- provide ease of use; even with a short cable it's easy to lock a bike securely
- are cost effective. A large scale increase in bike parking can be provided cost effectively; Bike Bollards are similar in cost to standard bollards
- save space while providing maximum security

CUSTOMIZATION TO MEET YOUR NEEDS

Installation

Whether you need your bike bollards, bike lockers or bike racks to be installed on new concrete, existing concrete, asphalt, landscaping or any other surface, Reliance Foundry can supply the means to have your bicycle storage units mounted with ease. Our bike bollards, lockers and racks are quick and easy to install, and come complete with easy-to-understand instructions.

Finishes and Accessories

All of our cycle storage products are manufactured using high quality materials; they are strong, durable and weather resistant. They are available in several standard, powder-coated colors - from our popular, textured "Hammer Black" to a metallic silver finish. Some of our bike racks and bike bollards can be ordered in stainless steel as well.

OUR CYCLE STORAGE SOLUTIONS SATISFY ALL DESIGN STYLES & CONSTRUCTION NEEDS, THEY ARE QUICK EASY TO INSTALL, THEY HAVE A LONG & LOW-MAINTENANCE SERVICE LIFE, AND THEY ARE READILY AVAILABLE WHEN YOU NEED.
